

IT Services

Plug in and be productive

Design. Fabricate. Build.

About aSa IT Services

aSa's certified IT staff delivers top-notch technology to keep your system working at maximum productivity.

Computer systems are an essential part of your business. Whether you run aSa.Studio in the cloud or maintain your own in-house database and network, aSa's IT department helps ensure that your system operates smoothly.

We work with industry leaders like Microsoft, Dell, Zebra, Sato, and Honeywell to bring you the best possible solutions to run your business.

Helping you work smarter

Cloud solutions

- ✔ Software as a Service (SaaS) - aSa.Studio and Go Rebar are completely cloud-based solutions. We handle the hosting, data management, and file storage. You simply log in and get to work.
- ✔ Infrastructure as a Service (IaaS) - Regardless of the software tools you use, your SQL Server, Terminal Server, virtual network, VPN access, and backup storage can all be hosted in the cloud through aSa. Pay a smaller monthly fee rather than a big up-front investment in on-site hardware technology.
- ✔ Microsoft 365 - Be more efficient than ever ... from anywhere! Includes Office suite, Exchange email, Microsoft Teams, and much more.
- ✔ All our cloud solutions are hassle-free. Our team:
 - configures and monitors your cloud resources
 - manages backups and disaster recovery

Hardware solutions

- ✔ Computers - aSa provides notebooks, PCs, and servers from Dell. The pricing, quality, and warranty of Dell products is simply the best in the business.

- ✔ Printers - We supply Zebra and Sato thermal transfer printers optimized for your rebar tags. We also supply tag material and ribbons.
- ✔ Scanners - Barcode scanners are essential for automating your equipment and tracking material. Options include Zebra mobile units and TouchTrackers: industrial tablet PCs with attached Honeywell hand scanners.
- ✔ No matter what you order, our IT staff checks and configures each piece of hardware before it is shipped, so you can get up and running quickly.

Other tech solutions

- ✔ Backup and anti-malware systems – Your data is the lifeline of your business. We help keep it secure from threats and backed up properly. Additionally, our team works with you to make sure you know how to use the tools we supply.
- ✔ Setup services – From configuring your database in the cloud to networking your scanners in the shop, our IT department functions as an extension of your own technology staff.

Experience these key benefits

Enjoy turn-key solutions

Whether you run aSa in the cloud or purchase hardware for a self-hosted system, we do the hard work for you. Our solutions are preconfigured, so you can plug in, log on, and be ready to work!

Work with a company that knows your business

Thousands of retailers sell computers and cloud computing services, but only one of those providers — aSa — has a stake in *your* industry.

Secure your organization

Viruses, hackers, and ransomware are constant threats to your system. With the help of aSa's IT staff, you can mitigate malware risks and have good working backups so you never lose your work.

Stay on the cutting edge

aSa is dedicated to finding the best technology for your industry. aSa's extensive research and testing allows us to offer thermal printing, barcoding, and cloud solutions that help your operation run more efficiently.

Reduce downtime

We offer extended Dell-provided next-day warranties on every computer we supply. Plus, aSa's setup services will save you valuable time when your hardware arrives.

Rely on knowledge from the source

No one is better equipped to serve your technology needs than the same team that supplies your aSa software. We'll help you get the most from your rebar tools.
