

aSa Cloud Solutions

Secure. Convenient. Affordable.

Design. Fabricate. Build.

About aSa Cloud Solutions

With aSa, you get more than a spot in the cloud to host your software. You get a turn-key computing solution maintained by aSa's team of experts. Our experienced IT team will configure and monitor your cloud resources to ensure maximum efficiency; install and maintain your aSa.Studio software; assist with backups and disaster recovery; and much more.

It's all included in your aSa Cloud Solutions subscription!

Helping you work smarter

Flexible options that grow with your company

- ✓ We offer multiple service tiers to meet the budget and computing needs of any operation, large or small.
- ✓ Pick the service tier that's right for you. Switch tiers at any time as your needs change.
- ✓ ALL tiers include ...
 - Your own custom SSL-secured URL, such as *MyCompany.aSa.Studio*.
 - Automatic backups and disaster recovery.
 - System configuration, monitoring, and maintenance by aSa's cloud platform team.
 - Convenient monthly payment plan.

Standard

- ✓ Core cloud components:
 - Shared* web application environment.
 - Dedicated and secure database with shared* web server and SQL resources.
- ✓ Upgrades** are scheduled and performed with others in your tier.

Pro

- ✓ Core cloud components:
 - Dedicated web application environment.
 - Dedicated and secure database with shared* SQL resources.
- ✓ Upgrade** aSa.Studio on your own schedule.

Enterprise

- ✓ Core cloud components:
 - Dedicated web application environment.
 - Dedicated and secure database *and* dedicated SQL environment.
- ✓ Upgrade** aSa.Studio on your own schedule.
- ✓ Deploy and test new versions of aSa.Studio before going live in your production environment. Two test environments are provided, allowing you to test major and minor releases independently.

* Shared resources in Azure are optimized for performance and computing power.

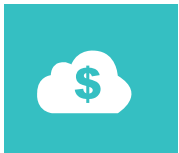

** All upgrades are handled by aSa's cloud platform team.

Experience these key benefits

Industry-leading technology

aSa Cloud Solutions is a service built on Azure, Microsoft's cloud computing platform. In addition to being extremely secure and powerful, Azure has data centers around the globe. This means your data will be hosted in your part of the world.

Affordable cloud hosting

Running Studio as a SaaS (Software as a Service) provides an excellent value. We leverage our partnership with Microsoft and pool resources to get you the best monthly rates.

No complicated installations

You'll spend little to no time installing software, setting up hardware, or configuring settings; instead, you can focus on your core business activities. We will set up your aSa.Studio database and software in the cloud. When it's time to upgrade, we handle that, too.

Automatic backups and maintenance

aSa sets up and monitors your environment and data backups. Backups are automatically geo-replicated to a separate Azure region. If you run into a problem, we'll restore your system to a specific point in time to avoid data loss and downtime. Within 35 days, we can restore to the *minute*. Long-term weekly, monthly, and yearly backup iterations are also retained up to three years.

Scalable to your needs

Whether you have a single Order Entry user or a multi-location enterprise, we offer a cloud solution for you. When you add users or new functionality, adjust your subscription to best fit your needs.

Security you can count on

You'll have your own custom SSL-secured URL for running aSa.Studio. The Microsoft Azure platform protects your system from common web vulnerabilities and exploits with built-in web application and database security. Regardless of your hosting tier, *only you* have access to your data. Period.

200+ cloud services

4+ million servers

140 countries worldwide

720+ million users

487,000+ businesses

85% of Fortune 500 companies

Microsoft Cloud Experience.

aSa Cloud Solutions is a service built on Microsoft Azure, one of the world's largest and most powerful cloud computing platforms. With aSa's hosting subscription, you not only get trusted Microsoft infrastructure, you get aSa pros to monitor and maintain your system. Plus, you won't have the expense and hassle of maintaining on-premises servers, backup systems, and related technology.
